## EDUCATION

### Government Engineering College Ajmer

B.Tech. in Computer Science and Engineering — CGPA: 7.85 — **Final Year**

Ajmer, Rajasthan

Expected 2027

## TECHNICAL SKILLS

|                |                                                                                    |
|----------------|------------------------------------------------------------------------------------|
| AI/ML          | RAG Pipelines,XGBoost, LLM Integration, Prompt Engineering, AI Agent Orchestration |
| Languages      | Python, C++,                                                                       |
| Frameworks     | REST APIs, FastAPI, Flask                                                          |
| Frontend       | React, Next.js, TypeScript                                                         |
| Visualization  | Power BI, Tableau, Matplotlib                                                      |
| Databases      | MongoDB, PostgreSQL, MySQL                                                         |
| Cloud & DevOps | Docker, Git, AWS                                                                   |

## PROFESSIONAL EXPERIENCE

### Full Stack Developer

May 2026 – Aug 2026

Napses Bangalore, India (Remote)

- Engineered production-ready React Native features, collaborated with a cross-functional team, and resolved Android platform bugs using Git-based workflows.
- Built and tested Android applications with Android Studio and Gradle, improving release stability through debugging.
- Developed an AI-powered semantic video search engine using Python, FastAPI, CLIP embeddings, and FAISS vector indexing.
- Implemented video frame extraction and embedding generation with OpenCV, enabling natural language-based video retrieval with timestamped results.
- Collaborated with senior developers on production workflows, API integration, and deployment practices in a remote engineering environment.

### Data Science Intern

March 2026 – May 2026

Celebal Technologies Jaipur, India

- Architected end-to-end RAG pipelines with LLMs; accelerated semantic search retrieval by 60% through optimized chunking strategies and vector database indexing.
- Engineered guardrail mechanisms that reduced hallucinations by 45%; evaluated 3+ embedding models to improve context injection accuracy for NLP tasks.
- Converted 8 research prototypes into hardened AI systems with fault tolerance mechanisms; deployed to staging environment with real-time monitoring and automated recovery procedures.

### Software Developer Intern

May 2025 – DEC 2025

Inspire Search Corp. Remote (Japan)

- Transformed legacy CLI web crawler into production-grade dashboard; reduced data processing latency by 50% through optimized orchestration logic and async handlers.
- Integrated dual AI backends (OpenRouter, Ollama) with intelligent fallback mechanisms; achieved 99.2% uptime across 10K+ daily API requests.
- Enhanced error handling and fault tolerance engineering; reduced LLM response parsing.

## PROJECTS

### Money Mule Detection System — GitHub

2025

- Developed production-grade ML pipeline achieving **91.2% accuracy** and **0.94 AUC-ROC**; processed 50K+ transaction records with behavioral risk scoring (0–100 scale).
- Engineered evaluation frameworks and testing harnesses supporting AML compliance; reduced false positives by 35% through ensemble model optimization.
- Deployed interactive analytics dashboard serving 3+ fraud investigation teams; enabled 20% faster pattern detection through intelligent filtering and visualization.

### VitalGene AI — GitHub

2025

- Developed TypeScript application processing 1000+ genomic records; architected agent orchestration layer achieving 96% accuracy in pharmacogene classification.
- Executed VCF file parsing with CPIC-based drug recommendations; analyzed genetic variants across CYP2D6, CYP2C19, and DPYD supporting clinical decision-making for 50+ patient profiles.
- Built client-side evaluation framework reducing recommendation inference time by 55% through optimized vector operations and caching strategies.

## ACHIEVEMENTS & CERTIFICATIONS

- Winner** – Code Nakshatra 2.0 Hackathon, TIIPS, Greater Noida
- 1st Place** – AMD Slingshot Ideathon, NIMS University, Jaipur
- Finalist** – RIFT Hackathon, PW IOI, Noida
- Technical Head** – Cybersecurity Club, Government Engineering College Ajmer
- Data Analytics Certification** – CodeWithHarry (Data Analysis with Python)
